PERSONAL ROUTINE JOURNAL

Daily

Set a weekly rhythm, record check-ins and revisit the week from a browser or Android phone.

QUICK START

Open: daily-routine-journal.onrender.com

Run locally:

```
python -m http.server 8000 --directory static --bind 127.0.0.1
```

Next: Run from the repository root; open http://localhost:8000

YOUR FIRST SESSION

01 Open the website or install Android APK 1.1.0 from the repository README. Android requires version 8 or newer and an up-to-date System WebView.

02 Create a routine, add habits and select the weekdays for each. Mark habits complete from the daily view and add notes as needed.

03 Review saved days and weekly charts. Export reports for viewing; choose JSON to move the journal to another device.

04 Use Restore to import a JSON backup. Optional password protection is for a device-local workspace; save its recovery information separately.

DATA AND PRIVACY

The website and Android app keep separate device-local records. There is no automatic cloud sync. JSON backups contain plaintext notes. Clearing browser data or uninstalling Android removes local records.

LIMITS TO KEEP IN MIND

Browser reminders require the page to stay open; Android reminders can be delayed by the OS. Physical-device behavior has not been verified here.
